EXPOBAR

ONYX

ONYX

Born from the perfect combination of reliable, high performance Expobar machines and our continuous pursuit of innovative solutions to push coffee technology further, ONYX is the professional grade premium espresso machine that merges creative design with endless customization possibilities.
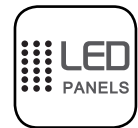

Our goal from the very beginning of this journey has been to create an espresso machine that can hard work all day long while still looking its very best, perfectly balancing exceptional beauty with practical utility for demanding baristas.

CUSTOMIZATION

We realize that every serving space is unique, so to make sure that ONYX fits perfectly into any environment we have designed it to be easily customized through easily changeable graphic slots, custom inserts in the exterior panels, or by custom-designed side and back LEDs.

Customized Panels
Side and back panels can be customized to suit any need or environment.

LED Illumination
LED panels on 3 sides allow for virtually unlimited custom branding opportunities.
Pro models only.

FUNCTIONALITY

From the very first concept brief our goal for ONYX has been to follow the mantra of form follows function. The result is a feature-packed espresso machine that is as intuitive as it is attractive, with each feature and control mechanism falling right into hand from the very first brew.
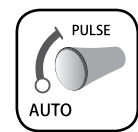

Touchscreen UI
Take control of brewing, programming and cleaning functions with a 2.5" LCD touchscreen display.
Pro models only.

Straight Anti-suction Steam Wands
Straight-flow wands ensure minimal steam restriction and anti-suction valves plus Teflon coatings keep everything hygienic and easy to clean.

Group Flushing
Keep each group clean and ready to go between brews with just the push of a button.

Pulse/Auto Steam Controls
Perfectly steam milk by hand, or reduce labour by letting steam flow automatically.

Soft Preinfusion Heads
Allow coffee to develop its flavour naturally with preinfusion and complete saturation in every dose.

Quick Release Cup Shelves
Cup shelves fold up when not needed, and remove with just the press of a button for cleaning.
Pro models only.

Insulated Multiboilers with PID Control
PID digital temperature control across all groups guarantees accurate heating for every brew.
Pro models only.

Automatic Cleaning
Auto cleaning means the group head and shower always stay clean and ready for the next brew.

ONYX *Pro*

ONYX Pro is currently available in the following configurations:

2 Group (400V, 3-phase)
3 Group (400V, 3-phase)

All configurations listed above feature tall espresso groups with fold-awaycup trays for smaller cups.

All Pro models are available with auto-steamer as an option.

ONYX Pro 2GR

Side- and back panel with LED
Pro model only

ONYX

ONYX is currently available in the following configurations:

2 Group MINI (230V, 1-phase)*
2 Group (230V, 1-phase)
3 Group (400V, 3-phase)

All configurations listed above feature standard height espresso groups.

*MINI machines feature one steam wand and your choice of either a hot water tap or second steam wand.

ONYX Mini 2GR

ONYX 3GR

The LCD touchscreen allows you to take control of your brewing, programming and cleaning functions in one easy to use interface.

Programmable independent temperature displays put the barista in control and let you keep an eye on heating for the perfect espresso every time.

Pulse and auto steam control knobs allow for exact steaming and frothing when it's needed, and hands-free operation when it's not.
